LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
BUREAU OF STATISTICS,
Washington, D. C., June 8, 1910.

SIR: I have the honor to transmit herewith a compilation of statistics of the imports of farm and forest products into the United States for the year ending June 30, 1909, with those for two previous years given for comparison. The data have been derived from the Bureau of Statistics of the Department of Commerce and Labor, and the work of compiling has been performed by the Division of Production and Distribution.

This report is a continuation of a series of bulletins on the same subject designed for the use of this Department and to meet the demands of a large number of correspondents. They contain an arrangement of the statistics and a determination of totals, with various comparisons, not presented in any other publication.

It is respectfully recommended that this report be published as Bulletin 82 of this Bureau.

Very respectfully,

VICTOR H. OLMSTED,
Chief of Bureau.

HON. JAMES WILSON,
Secretary of Agriculture.

EXPLANATION OF TERMS.

IMPORTS.—Goods from a foreign country entered at a custom-house.

IMPORTS FOR CONSUMPTION.—The term “entry for consumption” is the technical name of the import entry made at the custom-house, and does not imply that the goods will be actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

FOREIGN EXPORTS OR REEXPORTS.—Goods which have been imported into this country, either for reexport or for consumption, and are afterwards exported, having undergone no change in form or condition or enhancement in value by the application of labor in the United States.

DOMESTIC EXPORTS.—Goods produced or manufactured in this country from either domestic or imported raw materials, and which are shipped to foreign countries.

TRANSIT OR IN-TRANSIT TRADE.—Goods from a foreign country passing through the United States on the way to the same or another foreign country.

TRANSSHIPMENT TRADE.—Goods from a foreign country received at a United States port and there reshipped to a foreign country without being entered as an import into this country.

In-transit and transshipment trade is not included in the imports and exports of the United States, but is reported separately.

THE COUNTRY OF CONSIGNMENT is that which is mentioned in the exporting or importing documents as the one from which or to which the merchandise is to be shipped. The regulations of the Bureau of Statistics, Department of Commerce and Labor, are:

Collectors will consider the country in which merchandise was invoiced as the country whence the same was imported into the United States.

In export statements the countries stated should be, so far as can be ascertained, those for which the exports are destined for a market. * * * Exporters will be required to state in their manifests of goods exported the country of ultimate destination.

The country from which or to which goods are consigned may or may not be the country of origin or ultimate destination, as the case may be; the foregoing regulation with regard to the country of ultimate destination in export statements does not result in a material representation of countries of ultimate destination in place of countries of consignment in the records of the exports of this country, when these two countries are not the same.

VALUES.—The values of imported articles subject to *ad valorem* duties are defined by the Act of Congress of June 10, 1890, as—

The actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks, and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

The value of all other imports, whether subject to specific duty or free of duty, is also determined according to the law just quoted.

The value of domestic exports is their declared value at the time of exportation in the ports of the United States whence they are exported, which the law requires to be stated under oath, with penalty for misstatement.

The value of foreign exports when shipped directly from bonded warehouses (usually dutiable goods) is their import value, but when not shipped from bonded warehouses (usually free goods) the value is determined in the same manner as that of domestic exports.

Goods in transit through the United States from one foreign country to another are valued in the same manner as imports.

Valuation deceptions.—The value of imported articles subject to *ad valorem* duties is believed to be determined with more accuracy, according to the legal method of valuation, than the value of imports with specific duties or free of duty, or the value of exported articles; the valuations of dutiable imports and of exports dutiable in foreign countries tend to understatement; and the valuations of imports that are free of duty are liable to inflation for the purpose of trade deception.

WEIGHTS.—In the official trade returns of the United States the weights of articles exported are usually net weights, and also the weights of all imports, except those which are subject to a specific duty levied upon the weight of the packages, including the weight of the article itself, together with some or all of its coverings.

All tons mentioned in this bulletin, except where it is otherwise stated, are long tons of 2,240 pounds.

DISCREPANCIES IN FOREIGN TRADE STATISTICS of various countries are partly due to different methods of estimating values, of determining countries of origin and destination, and of classifying merchandise, and to differences in dates. The United States does not regard a c. i. f. value (cost, insurance, freight) as the value of either exports or imports (except some foreign exports), while the United Kingdom, for instance, includes these in the value of its imports. It is said that these charges are often erroneously included by British shippers in their statement of export values, especially when the selling price includes insurance and freight.

In consequence of various sources of discrepancy, it is generally futile to undertake to balance an export of this country by any official statement of import into a foreign country, and often there is not an approximate agreement.

NONCONTIGUOUS POSSESSIONS.—The noncontiguous possessions of the United States are all those not included between Canada on the north and Mexico and the Gulf of Mexico on the south, and between the Atlantic and Pacific oceans.

The trade returns of all the possessions of this country, except the Philippine Islands, are included in the total trade of the United States. In the trade statistics for any noncontiguous possession, all other noncontiguous possessions, except the Philippine Islands, are included with the United States; thus, shipments from Hawaii to Porto Rico are included in the total shipments from Hawaii to the United States.

ABBREVIATION.—"n. e. s." = not elsewhere specified.

IMPORTS OF FARM AND FOREST PRODUCTS, 1907-1909.

GENERAL SURVEY.

The value of farm products imported into the United States during the year ending June 30, 1909, amounted to \$639,000,000, an increase of \$99,000,000 over the previous year and \$12,000,000 more than in 1907. The value of all merchandise imported in 1909 was \$1,312,000,000, an increase of \$118,000,000 as compared with 1908, and a decrease of \$123,000,000 compared with 1907; the imports of farm products formed such a large proportion of the total imports as to show a percentage for the three years, respectively, of 43.7, 45.2, and 48.7 per cent.

The imports of forest products in 1909 exceeded in value those of each previous year and were valued at \$124,000,000, an increase over the previous year of \$26,000,000 and \$1,500,000 more than in 1907. Of the enormous increase over 1908, \$25,000,000 was due to india rubber, the article that caused more than 90 per cent of the big decline in the total of 1908 from that of 1907.

As shown in Table 3, the relative rank of the grand divisions as sources of imports of farm and forest products was the same for each of the three years, with one exception. North America ranked second as a source of imports of forest products in 1907, but rose to first place in 1908 and 1909. Each of the grand divisions, with one exception, Africa, shows an increase as a source of imports of farm products in 1909 as compared with 1908.

Farm products valued at \$214,000,000, or nearly one-third of the total farm products imported, came from Europe, \$152,000,000 from North America, \$135,000,000 from Asia, and \$137,000,000 from the other three grand divisions. The largest increase in value in 1909 over the preceding year was in imports from Europe; farm products from this grand division amounted to \$177,000,000 in 1908, and \$214,000,000 in 1909, which was \$10,000,000 more than in 1907.

In imports of forest products South America, compared with other grand divisions, showed the greatest decline in 1908 and the greatest increase in 1909, both of which were due to india rubber.

In each of the three years mentioned in Table 4 the imports from Cuba exceeded those from any other country. In 1908 the imports

from that country were \$14,000,000 less than in 1907, and in 1909 they were \$15,000,000 more than in 1908, the variations being due principally to shipments of sugar. Other countries showing large increases in 1909 over 1908 were as follows: United Kingdom, \$20,000,000; Argentina, \$11,000,000; Brazil, \$9,000,000; Dutch East Indies, \$9,000,000; France, \$6,000,000; Chinese Empire and Italy, each \$5,000,000; other countries having an increase of more than \$4,000,000 were British India and Japan.

As shown in Table 5, imports of forest products in 1909 were valued at \$124,000,000; of this amount \$80,000,000, or nearly two-thirds, came from three countries, Brazil, Canada, and the United Kingdom. Brazil occupied first place in 1907, fell to second place in 1908, and rose to first place in 1909—these changes being due to imports of india rubber from that country. Other countries showing increases which were due principally to the same article were the United Kingdom, \$7,000,000; Germany and Mexico, each with increases of more than \$1,000,000.

The aggregate value of the six principal groups of farm products imported in 1909 was \$437,000,000, as compared with \$353,000,000 in 1908 and \$443,000,000 in 1907. The value of the leading groups in 1909 was nearly \$98,000,000 for sugar and molasses, \$92,000,000 for packing-house products, \$80,000,000 for silk, \$79,000,000 for coffee, \$45,000,000 for wool, and \$43,000,000 for vegetable fibers, chiefly cotton, sisal, manila, and jute. Other important imports in 1909 were tobacco, \$25,000,000; alcoholic liquors, \$23,000,000; and fruits, \$22,000,000, of which bananas were valued at \$11,000,000. The principal groups of imports of forest products were india rubber, \$62,000,000; lumber, \$21,000,000; and wood pulp, \$9,000,000. (See Table 6.)

Shipments of farm products to the United States from its island possessions and Alaska in 1909 were valued at \$71,000,000, a decrease of \$2,500,000 compared with 1908 and an increase of \$13,000,000 compared with 1907. In 1908 and 1909 sugar from Hawaii formed more than 50 per cent of the total shipments of farm products from all noncontiguous possessions. In 1909 the value of the sugar sent to the United States from these possessions was \$58,000,000, manila fiber \$7,000,000, fruit \$2,500,000, and tobacco \$1,000,000.

Shipments of forest products to the United States from its non-contiguous possessions in 1909 were valued at \$118,000, more than half of which represented gums and lumber from the Philippine Islands. The shipments of timber from Hawaii were valued at \$45,000. (See Tables 7 to 13, inclusive.)

TABLE 1.—*Value of imports of FARM products into the United States, 1851-1909, and comparison with total imports.*

[All values are gold.]

Year ending June 30—	Total.	Farm products. ^a	Other than farm products.	Per cent of farm products of total.

1904.....	991,087,371	461,434,851	529,652,520	46.6
1905.....	1,117,513,071	553,851,214	563,661,857	49.6

^a The classification employed from 1890 to 1901 differs from the present classification by including prepared opium and (in 1896-1901) gelatine, but not cochineal, licorice root, nor (in 1891-1893) beer extract. The value of the products included in this table for 1890-1901, but not subsequently, was as follows: Prepared opium, 1890, \$269,586; 1891, \$567,035; 1892, \$547,528; 1893, \$446,422; 1894, \$310,771; 1895, \$920,006; 1896, \$735,134; 1897, \$1,132,861; 1898, \$652,341; 1899, \$828,203; 1900, \$1,065,965; 1901, \$972,582; gelatine, 1896, \$15,386; 1897, \$5,748; 1898, \$25,907; 1899, \$21,961; 1900, \$30,361; 1901, \$23,230; the value of the products now included, but not in 1890-1901, was as follows: Cochineal, 1890, \$42,435; 1891, \$19,779; 1892, \$55,883; 1893, \$52,572; 1894, \$23,124; 1895, \$38,568; 1896, \$50,988; 1897, \$41,943; 1898, \$45,762; 1899, \$23,207; 1900, \$31,211; 1901, \$20,414; licorice root, 1890, \$794,503; 1891, \$896,597; 1892, \$1,601,028; 1893, \$1,688,716; 1894, \$1,209,728; 1895, \$1,404,563; 1896, \$1,401,748; 1897, \$1,022,650; 1898, \$1,171,621; 1899, \$1,566,830; 1900, \$1,667,256; 1901, \$1,737,097; beer extract, 1891, \$6,470; 1892, \$5,411; 1893, \$2,291.

TABLE 1.—*Value of imports of FARM products into the United States, 1851-1909, and comparison with total imports—Continued.*

Year ending June 30—	Total.	Farm products.	Other than farm products.	Per cent of farm products of total.
1906.....	\$1,226,562,446	\$554,175,242	\$672,387,204	45.2
